Contents to Part III

Introduction vii

LT-20 Committees ix

Report from the General Chairman xiii

Closing Remarks xvi

Contents to Part III xvii

1. Fritz London Memorial Lectures

Anomalies in the heat capacity of 2D fluid and solid ^{3}He at low mK temperatures (Fifteenth Fritz London Memorial Award Lecture)
D.S. Greywall 1

What causes the observed differences between solid H_2 and D_2?
H. Meyer 13

2. Techniques and Applications

National High Magnetic Field Laboratory: Facilities and scientific opportunities
J. Brooks, J.E. Crow, D.M. Parkin, H.J. Schneider-Muntau and N.S. Sullivan 19

Applications of low temperature physics to gravitational astronomy
D.G. Blair 28

Low temperature detectors for elementary particles
N.E. Booth, P.L. Brink, R.J. Gaitskell, D.J. Goldie, A.D. Hahn, G.L. Salmon and A.M. Swift 39

New types of dilution refrigerator and space applications
A. Benoît, M. Caussignac and S. Pujol 48

SQUID technology and brain research
O.V. Lounasmaa, J. Knuutila and R. Salmelin 54

Low-temperature scanning tunneling microscopy
B. Reihl, J.K. Gimzewski, R. Schlittler, M. Tschudy, R. Berndt, R. Gaisch and W.D. Schneider 64

Superconducting cavities for particle accelerators
C. Benvenuti, S. Calatroni and G. Orlandi 72

Low temperature research in microgravity
D.M. Strayer 84

3. Magnetism

Coherent phenomena in mesoscopic cylinders of Cu and Ag in proximity with a superconductor
A.C. Mota, P. Visani, A. Pollini and K. Aupke 95

Groundstate properties of YbBiPt
P.C. Canfield, R. Movshovich, R.A. Robinson, J.D. Thompson, Z. Fisk, W.P. Beyermann, A. Lacerda, M.F. Hundley, R.H. Heffner, D.E. MacLaughlin, F. Trouw and H.R. Ott 101

Magnetic quantum tunneling and the topological phase
D.P. Di Vincenzo 109

Nuclear magnetic ordering in metals
F. Pobell 115

Low temperature studies on normal perovskite oxides: role of correlation and disorder
A.K. Raychaudhuri, K.P. Rajeev, H. Srikanth and R. Mahendiran 124

Dissipation and decoherence in quantum magnetic systems
P.C.E. Stamp 133

Quantum oscillations in artificial impurity lattices
K. Nakamura, S. Ishizaka and F. Nihey 144

Local magnetization and magnetotransport in magnetic semiconductors
S. von Molnár, I. Terry, T. Penney and P. Becla 151

Spin fluctuations in insulating, weakly metallic and superconducting $La_{2-x}Sr_xCuO_4$
G. Shirane, R.J. Birgeneau, Y. Endoh and M.A. Kastner 158

4. Quantum Fluids and Solids

A novel approach to the observation of the condensate fraction in superfluid helium four
J.W. Halley 175

Two low temperature applications of path integrals: superfluidity in ^{4}He and orientational ordering in solid H_2, D_2
E.L. Pollock and K.J. Runge 180

Excitations in superfluid ^{4}He and the condensate
L. Reatto, G.L. Masserini and S.A. Vitiello 189

Final-state effects and momentum distribution in normal liquid ^{4}He
K.H. Andersen, W.G. Stirling, H.R. Glyde, R.T. Azuah, S.M. Bennington, A.D. Taylor, Z.A. Bowden and I. Bailey 198

Neutron scattering studies of liquid ^{3}He and ^{3}He–^{4}He mixtures
B. Fåk and R. Scherm 206

The superfluid transition of ^{4}He in the presence of a heat current: renormalization-group theory
V. Dohm and R. Haussmann 215

Classical analogs of mesoscopic quantum phenomena
J.D. Maynard 231

Heat capacity and thermal relaxation of bulk helium very near the lambda point
J.A. Lipa, D.R. Swanson, J.A. Nissen and T.C.P. Chui 239

^{3}He–^{4}He mixture in aerogel
J. Ma, S. Kim and M.H.W. Chan 249

Weak adsorption and prewetting transitions
M.W. Cole, E. Cheng, C. Carraro, W.F. Saam, M.R. Swift and J. Treiner 254

Scaling and dynamical effects on the superfluid transition in helium films
H. Chayet, R. Brada and W.I. Glaberson 260

Superfluidity in thin ^{4}He films adsorbed on graphite
P.A. Crowell and J.D. Reppy 269

Superfluid helium on solid hydrogen
J.M. Mochel and M.-T. Chen 278

Wetting transitions of helium on weak binding substrates
P. Taborek and J.E. Rutledge 283

Hydrodynamics of superfluid turbulence and its applications
S.K. Nemirovskii and W.M. Fiszdon 290

A study of homogeneous turbulence using superfluid helium
M.R. Smith 297

Phase slip phenomena in superfluid helium
E. Varoquaux and O. Avenel 306

Phase slip phenomena in superfluid helium
R.E. Packard and J.C. Davis 315

Numerical experiments on single quantized vortices
K.W. Schwarz 324

2D electron systems viewed through an RF spectrometer
E.Y. Andrei 335

Many-electron magnetotransport in 2D electrons on liquid helium
M.I. Dykman, M.J. Lea, P. Fozooni and J. Frost 340

Spectroscopic study of excess electrons in liquid helium
S.V. Pereverzev and A.Ya. Parshin 347

Ionic Coulomb crystals in superfluid helium
W.F. Vinen, N.J. Appleyard, L. Skrbek and P.K.H. Sommerfeld 360

Evolution of imploding cylindrical second sound waves in superfluid ^{4}He
G. Stamm, W. Fiszdon and T. Olszok 369

A–B phase transition in rotating superfluid ^{3}He
M. Krusius, E.V. Thuneberg and U. Parts 376

Superfluid ^{3}He at very low temperatures: a very unusual excitation gas
G.R. Pickett, M.P. Enrico, S.N. Fisher, A.M. Guénault and K. Torizuka 390

Nucleation in supersaturated ^{3}He–^{4}He liquid mixtures: decay of metastable states at ultralow temperatures
T. Satoh, M. Morishita, S. Katoh, K. Hatakeyama and M. Takashima 397

Experiments on polarization-dependent transport in ^{3}He systems
D. Candela, D.R. McAllaster, L-J. Wei and N. Kalechofsy 406

Thermodynamic measurement of the magnetization curve of liquid ^{3}He up to 200 Tesla
M. Bravin, S.A.J. Wiegers, L. Puech and P.E. Wolf 410

Atomic hydrogen in magnetostatic traps
J.T.M. Walraven and T.W. Hijmans 417

Negatively charged helium microdroplets
J.A. Northby, C. Kim and T. Jiang 426

5. Electrons in Condensed Matter

Non-Fermi liquid behavior in strongly correlated metals
E. Abrahams 435

Measuring electron–electron scattering rates through mutual friction
T.J. Gramila, J.P. Eisenstein, A.H. MacDonald, L.N. Pfeiffer and K.W. West 442

Magnetic-field-induced transition: from an Anderson insulator to a quantum Hall conductor
H.W. Jiang, C.E. Johnson, K.L. Wang and S.T. Hannahs 449

Normal metallic states of interacting electrons: Luttinger liquid versus Fermi liquid
W. Metzner 457

6. Superconductivity

The layered S–N model of HTSC and its physical properties
A.A. Abrikosov 466

The difficulty in identifying exotic superconductors
C.M. Gould 472

Mesoscopic superconductor–semiconductor heterostructures
T.M. Klapwijk 481

Measurement of the incremental charge of a superconducting island
D. Esteve, P. Lafarge, P. Joyez, C. Urbina and M.H. Devoret 500

Vortex fluctuations in Josephson-coupled superconductors
L.N. Bulaevskii, M.P. Maley and I.F. Schegolev 506

Persistent currents in a GaAs–AlGaAs single loop
D. Mailly, C. Chapelier and A. Benoit 514

Electron tunneling studies of ultrathin films near the superconductor-to-insulator transition
J.M. Valles Jr., S.-Y. Hsu, R.C. Dynes and J.P. Garno 522

Studies of two-dimensional MoGe superconductors in a magnetic field
A. Kapitulnik, A. Yazdani, J.S. Urbach, W.R. White and M.R. Beasley 530

Ordered phases and phase transitions in type-II superconductors
D.A. Huse 540

Doped fullerenes: a soot to superconductivity story
A.F. Hebard 544

The superconducting phases of UPt_3
H.v. Löhneysen 551

Mixed state properties of organic superconductors
T. Ishiguro, H. Ito, Yu.V. Sushko, A. Otsuka and G. Saito 563

The superconducting $HgBa_2Ca_{n-1}Cu_nO_{2n+2+\delta}$ homologous series
M. Marezio, E.V. Antipov, J.J. Capponi, C. Chaillout, S. Loureiro, S.N. Putilin, A. Santoro and J.L. Tholence 570

The effect of correlated and point defects on the vortex lattice melting transition in single-crystal $YBa_2Cu_3O_{7-\delta}$
W.K. Kwok, J. Fendrich, S. Fleshler, U. Welp, J. Downey, G.W. Crabtree and J. Giapintzakis 579

Thermal diffusion of quasiparticles and vortices in high-temperature superconductors
R.P. Huebener, R. Gross, H.-C. Ri and F. Gollnik 588

Effects of reduced dimensionality on the energy dissipation of superconducting $Bi_2Sr_2CaCu_2O_8$ compounds
F. de la Cruz, E. Rodríguez, H. Pastoriza, A. Arribére and M.F. Goffman 596

High-temperature $^{63,65}Cu$ NQR and NMR study of the high-temperature superconductor $La_{2-x}Sr_xCuO_4$ $(0 \leqslant x \leqslant 0.15)$
T. Imai, C.P. Slichter, K. Yoshimura, M. Katoh and K. Kosuge 601

Microwave surface impedance of the cuprate superconductor $YBa_2Cu_3O_{6.95}$
W.N. Hardy, S. Kamal, D.A. Bonn, K. Zhang, R. Liang, E. Klein, D.C. Morgan and D.J. Baar 609

Atomic site tunneling spectroscopy on high-T_c superconductors
T. Hasegawa, M. Nantoh, A. Takagi, W. Yamaguchi, M. Ogino, M. Kawasaki, J.P. Gong, H. Koinuma and K. Kitazawa 617

Far-infrared magneto-optics of high-T_c superconductors
H.D. Drew, E. Choi and K. Karraï 624

Fermiology and superconducting gap anisotropy of cuprate superconductors
Z.-x. Shen 632

Suppression of superconductivity in homogeneously disordered systems
A.M. Finkel'stein 636
